SINCE 1905, MAKING TAPS IN ITALY

//

Rubinetterie Teorema has made the history of Made in Italy for more than 100 years.

Teorema products are synthesis of **design, usability, Italian quality in the bathroom** and kitchen. Teorema also means products that are environmentally friendly; in fact its production is conceived with the use of tools and technologies that allow you to produce taps with versatile design and which are impeccable with respect eco-sustainable philosophy.

Teorema Rubinetterie is today part of the **WTS Group**, a large Italian industrial group which is, thanks to its quality and strength, one of the major international landmarks for the residential, tourist-hotel and wellness tap industry.

WTS[®] GROUP

water tech solutions

// Quality

//

WTS joins to a dynamical and flexible structure the guarantee of the service offered by using the Certificated System UNI EN ISO 9001:2000 VISION. Carefully and scrupulous checks guarantee the respect of the strict qualitatives standard. All the material is controlled during the realization time:

- check of material composition;
- thickness of chrome;
- corrosive proof of each components;
- statically and dynamical test of leaking.

// Research and development

//

WTS owes its prestige to a constant research for methods and technologies which over the years have been the key to its development. The group entrusts its research and development department to an highly skilled team of engineers and technicians in order to carry out innovative technologies. The R&D department utilizes the latest 3D design systems. All our projects are developed according to the instructions of the customer, which is updated step by step on the development of the item. We are able to provide, in a short time, an actual prototype of the product required. The 3D files of the project are sent to a rapid prototyping printer which allows us to quickly make your projects real and concrete. The whole work is obviously designed and executed in compliance with the international standards.

// WTS Eco Green System

What does it mean WTS Eco Green System?

WTS is a green company based on eco-friendly values, which have the aim to respect the environment. The eco-green philosophy of WTS means:

SAVE WATER

as it is a precious necessity to be protected

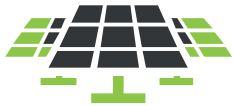

PRODUCE

with the minimal environmental impact

GUARANTEE THE QUALITY OF THE WATER

supplied by our products because the health of our customers is our main objective

// Sustainable Production

//

WTS makes the choice of giving to its corporate policy a distinctly ecological connotation. This commitment involves every steps of the production cycle, with the awareness that all the efforts could represent an important variable in the business strategy, as well as an ethical value of absolute importance. A new and modern photovoltaic system together with a chrome plating plant with zero discharge are the latest innovations WTS is proud to present.

// Plating plant with ZERO DISCHARGE

//

The chrome plating plant, installed in WTS production plant of San Maurizio D'Opaglio, has a purification system able to purify the wastewaters, to allow their reuse in the production cycle and consequently to avoid the emission in the environment: the WTS *chrome plating* plant can be defined as *Zero Discharge Plant*.

// Water saving philosophy

//

The WTS products are studied in order to allow the maximum water saving (up to 40%) but preserving the comfort and usability and, therefore, contributing to a socially responsible and eco-friendly usage of the available water resources.

// PWP - Pure water process

//

With the new process PWP, the leaching of toxic metals, as lead (-85%) and nickel (-95%), in drinking water is restricted. The PWP treatment consists in two steps:

1. the first step guarantees the chemical removal of Lead from faucets, valves, joints made of brass;
2. the second step consists in a very hard and corrosion proof plating with an electrochemical nickel. It contains additives which avoid the leaching of nickel ions when pieces come in contact with drinking water.

teorema[®]

SINCE 1905, MAKING TAPS IN ITALY

//History

//

The History of Teorema brand started long time ago: in 1905 Luigi Bonomi founded the “Metallurgica Bonomi” in Lumezzane (Brescia - Northern Italy), a metal workshop which in the years of the reconstruction of the country started its specialization in the Taps and Mixers sector. In 1970 born the Teorema brand; in a short time Teorema became one of the reference points in the sector thanks to progressive products like “Tex”, a single lever mixer which represents a real revolution in the sector. Since then, Teorema is the expression of a philosophy based on the total quality, reliability and Italian style. Every Teorema's tap is carefully projected, planned and created trying to obtain the top, both for design, technique and functionality.

Made in Italy

//A unique design

//

All the lines of Teorema designer faucets have a common denominator: functionality. Each product is designed to respect the aesthetics standard, time and the environment, with a look toward the trends of the moment and faithful, at the same time, to the traditional Italian style. Teorema design can't be taken away from its eco-oriented philosophy; that's why significant resources are invested in research and technologies which can enable the production of beautiful and innovative faucets in respect of an ethical even before aesthetical conception. Thanks to the taps Teorema and some of its lines fresh and versatile, XS and Lillo to name a few, it's easy to customize home environments giving them a touch of unique contemporary style.

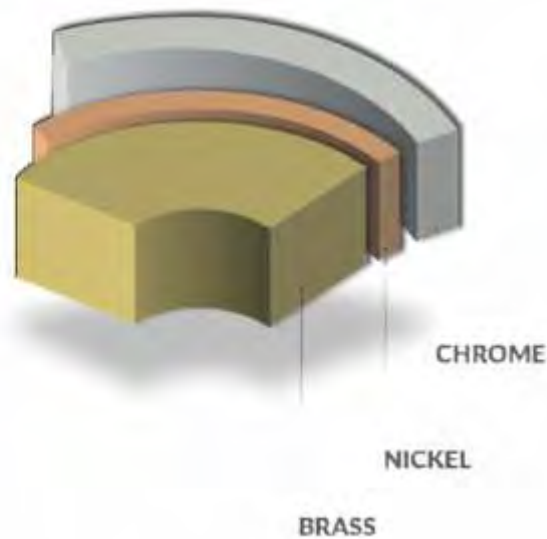

//Teorema Warranty

//

Teorema products are subjected to strict controls during every step of the production cycle to provide the best guarantees on the quality of the product. For this reason the Teorema taps are warranted against manufacturing defects for a period of 10 years.

// Double plate

//

Accurate productive process to guarantee the best resistance to the usury and brightness. All faucets are Double Plate, which are characterized by a double chrome plating and nickel plating to grant the product a long life.

// Why Teorema

// Water saving up to 40%

// The Teorema products are studied in order to allow the maximum water saving but preserving the comfort and usability. With its ranges, Teorema saves 10 litres of water a day per person (compared with 25 litres on average from a conventional tap). A solution which can save 3650 litres of water per person each year.

// Double plate

// All Teorema faucets are Double Plate, which are characterized by a double chrome plating and double nickel plating to grant the product a long life.

// Universal Installation

// All taps Teorema can be universally installed in every bathroom and kitchen. Teorema tap can replace any product of other brands installed in your home.

// Easy to assemble

// The installation of the product is easy thanks to clear instruction included and Teorema videos tutorial.

// Original spare parts

// All products are assembled using only original components WTS.

// Teorema strengths

LONGLIFE

// Long-lasting double interlock flexible hose in order to guarantee a long life and resistance to the strains and torsions.

SECURE COMFORT

// Standard Headwork. Guarantee of established quality standards. Tested with more than 500.000 cycles to guarantee the top secure comfort and duration.

SILVERTOUCH

// Silver Flexible Hose: the special plastic material used suggests the metal effect and combines a unique resistance together with a refined design. Anti-torsion connection for a very easy use.

QUICKSTOP

// Click Clack pop up waste. Without tie rod. Useful and fast. With an essential design allows in one touch the opening and the closure.

EASY FLOWING

// Cartridge tested in our laboratories with more than 70.000 cycles as stated by the European standards. The duration and easy flowing are guaranteed.

STANDARD STOP

// Standard pop up waste: the traditional one. Opening and closing always perfects.

ALWAYS CLEAR

// Teorema uses NEOPERL aerator, leader in the market, which avoid the lime formation and guarantee an easier maintenance.

//UWS - Unpolluted Water System

// Water stagnation area: non-toxic polyamide component, **ZERO RELEASE** of lead and nickel.

//

The new international regulations concerning the public health and especially the quality of the water supplied by the domestic faucets impose, in every EU country, important limits on the release of polluted elements, which will involve mandatory changes in the productive process currently used. In particular, the new regulations have the aim to monitor the quality of the supplied water by imposing strict limits on the release of two highly harmful elements, such as lead and nickel.

Lead and Nickel

Among the brass alloys, the lead is the element which improves the fluidity of the material (during the fusion step) and its workability during the process of machining (turning, threading, etc.). The new regulations allow to the usage of the lead only to a limited extent (with different thresholds depending on the materials).

Besides being presents in the brass alloy as a contaminant, the nickel is at the base of the surfaces chrome plating process (it is the first layer of deposit and it is used as a binder between brass and chrome). Due to the new regulations, its presence will be strongly restricted.

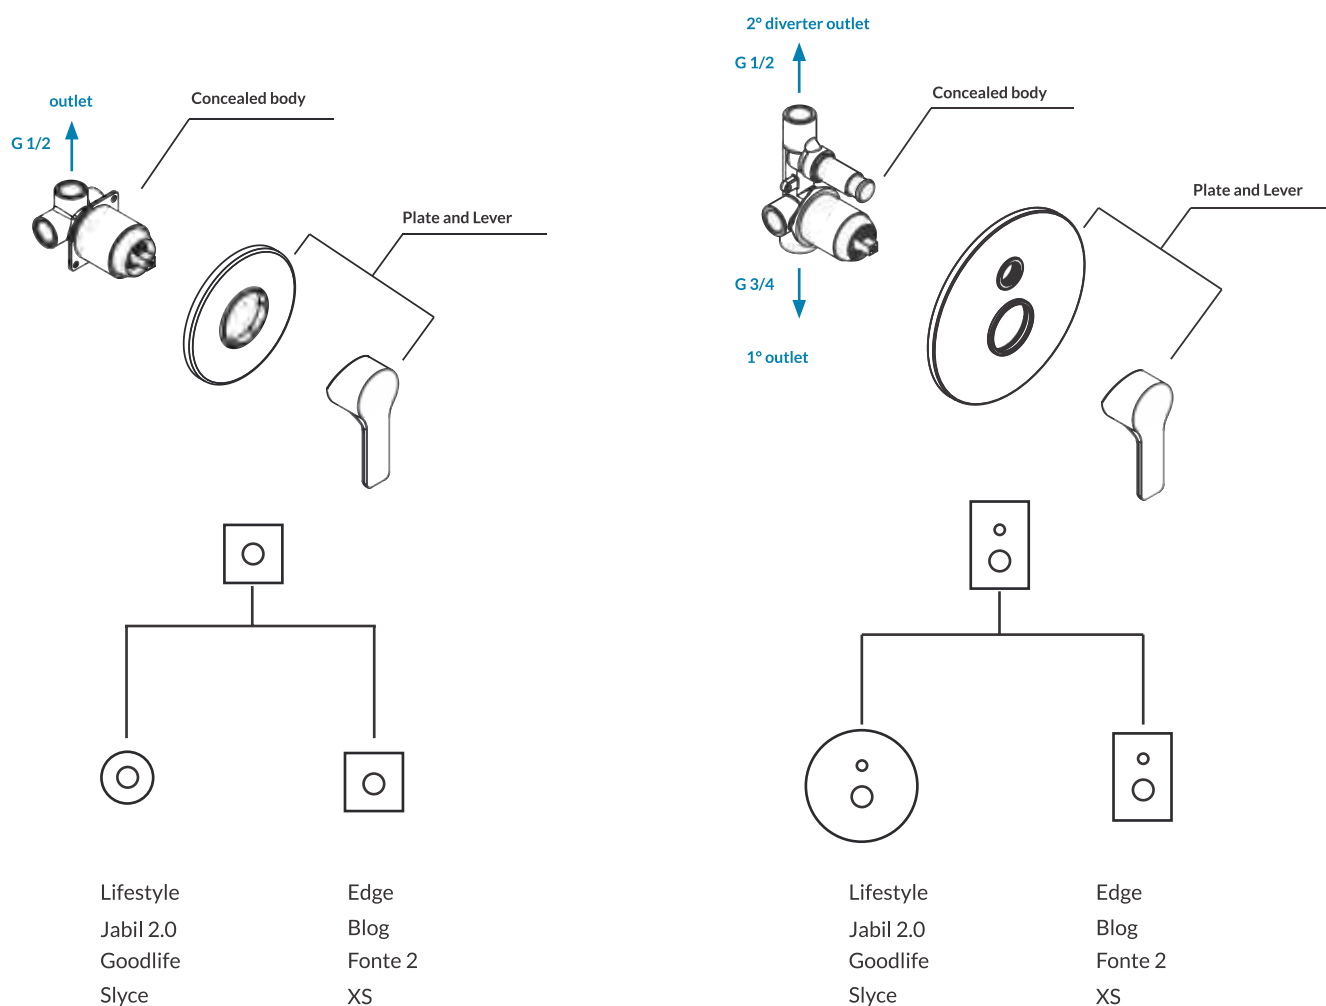

WTS reacts to this requirement with the project UWS that is "Unpolluted Water System"

Thanks to the special internal components of the taps, the new **UWS** technology guarantees to the end user the certainty to benefit from water completely devoid from the remains of lead and other metals damaging for the health. This avant-garde technology allows us to respect the new international regulations NSF/ANSI 61, which impose the reduction of the admissible standards for the contamination of the drinkable water caused by lead.

// Universal concealed system

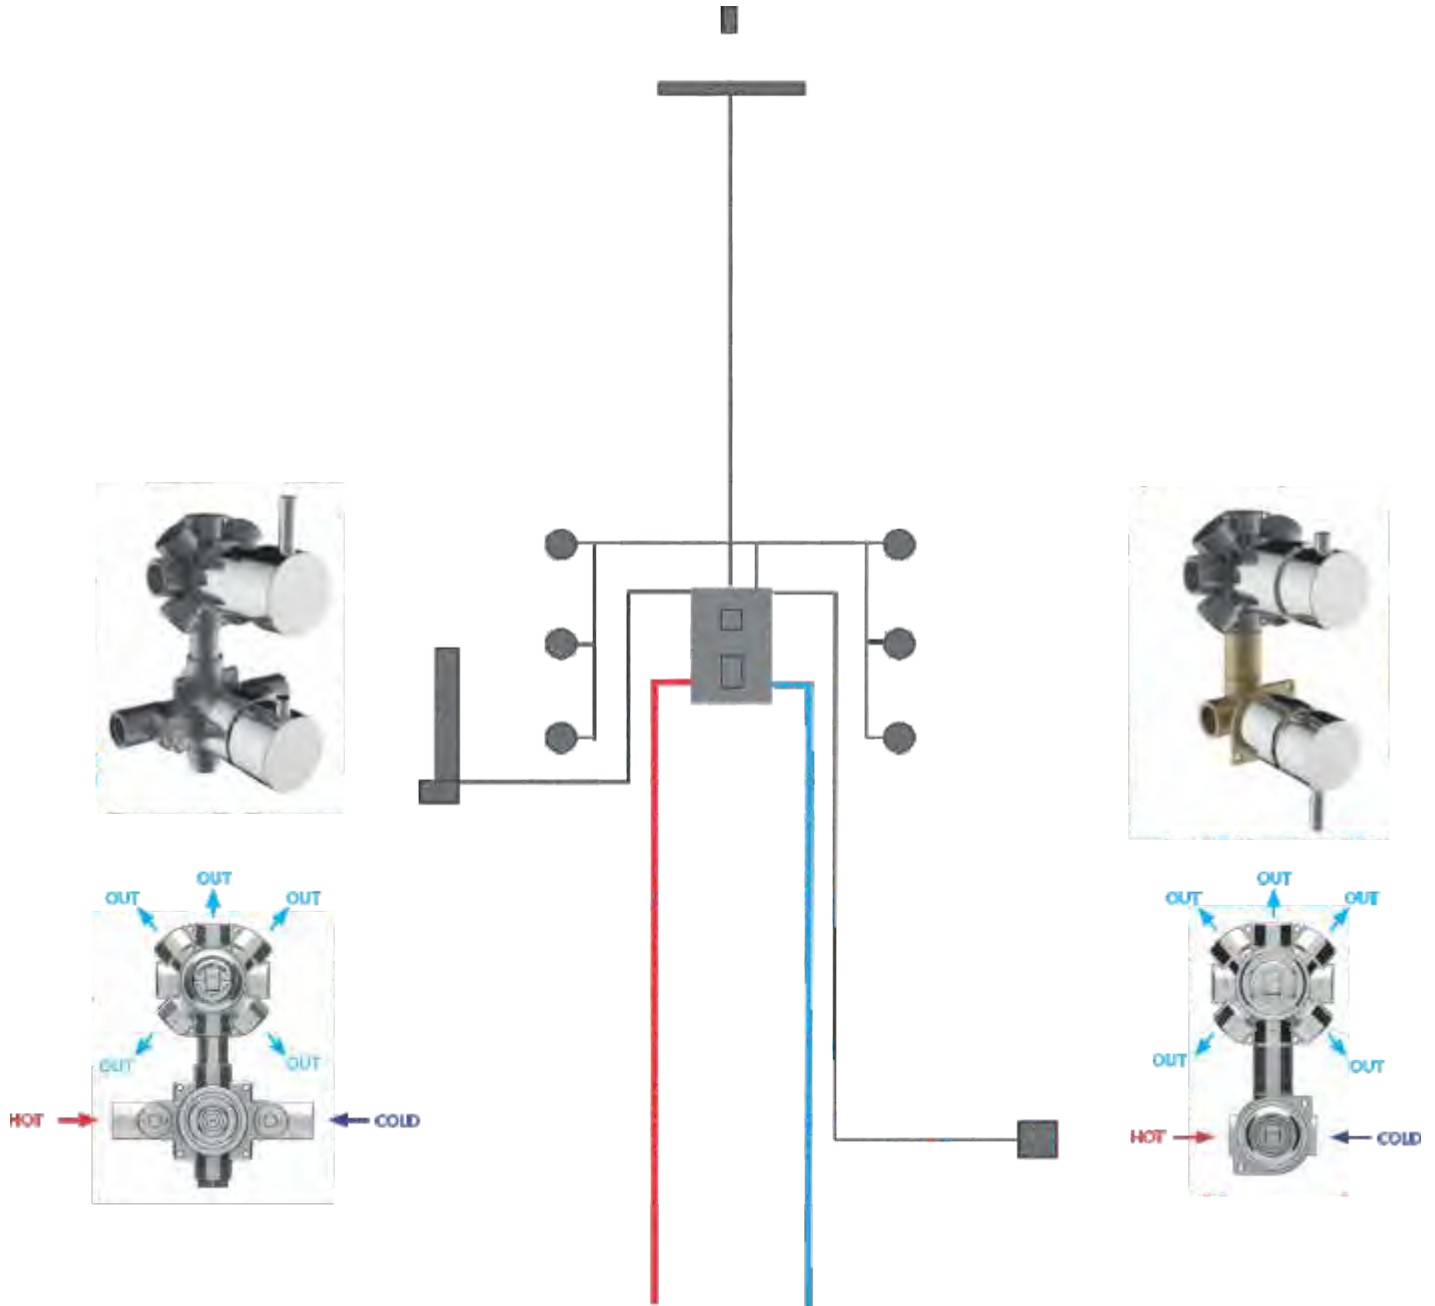

The universal concealed mixer system provides you a wide range of external trim with a unique concealed body, giving you more flexibility in the choice of the aesthetic of your bathroom.

//ONE to 5 system

// The ONE to 5 concealed THERMOSTATIC mixer allows, through the diverter, to manage the water flow from 1 up to 5 ways.

// The ONE to 5 concealed mixer allows, through the diverter, to manage the water flow from 1 up to 5 ways.

The strengths

SILVERTOUCH

// Silver Flexible Hose: the special plastic material used suggests the metal effect and combines a unique resistance together with a refined design. Anti-torsion connection for a very easy use.

QUICKSTOP

// Click Clack pop up waste. Without tie rod. Useful and fast. With an essential design allows in one touch the opening and the closure.

EASY FLOWING

// Cartridge tested in our laboratories with more than 70.000 cycles as stated by the European standards. The duration and easy flowing are guaranteed.

ALWAYS CLEAR

// Teorema uses NEOPERL aerator, leader in the market, which avoid the lime formation and guarantee an easier maintenance.

STANDARD STOP

// Standard pop up waste: the traditional one. Opening and closing always perfects.

DOUBLE PLATE

// Accurate productive process to guarantee the best resistance to the usury and brightness. All Teorema faucets are Double Plate, which are characterized by a double chrome plating and nickel plating to grant the product a long life.

UWS - Unpolluted Water System

// Thanks to the special internal components of the taps, the new UWS technology guarantees to the end user the certainty to benefit from water completely devoid from the remains of lead and other metals damaging for the health. This avant-garde technology allows us to respect the new international regulations NSF/ANSI 61, which impose the reduction of the admissible standards for the contamination of the drinkable water caused by lead.

// Water saving up to 40%

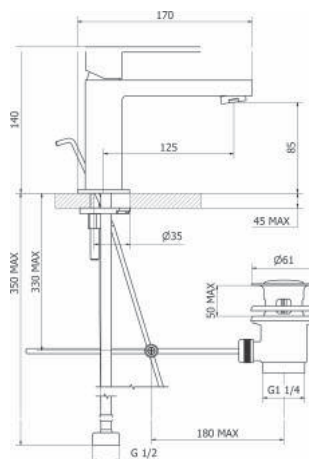

// The Teorema products are studied in order to allow the maximum water saving but preserving the comfort and usability. With its ranges, Teorema saves 10 litres of water a day per person (compared with 25 litres on average from a conventional tap). A solution which can save 3650 litres of water per person each year.

// WARRANTY:

Teorema products, severely tested before being sold on the market, are guaranteed to be free from defects of workmanship for a period of ten (10) years (for the chrome finish) and for a period of two (2) years all other finishes from the date of purchase by the original purchaser. The warranty on the cartridges and the spindles of the mixers is valid for 2 year.

This warranty includes:

1) Casting defects. Porosity defects. Chrome plating defects.

2) The repair and replacement of the defective part after the tests of our technical department und upon presentation of the purchase proof, as evidence of the date of purchase.

This warranty is no longer valid in the following cases:

1) Damage to the chrome finish caused by the use of cleaning products containing acids or abrasive substances.

2) Damage to finishes, other than chrome. The durability depends, in fact, on the care of the maintenance from the end user's side.

3) Damage to the faucet caused by improper installation.

4) Damage to the faucet caused by improper repairs and maintenance and without previous authorization of the Factory.

This warranty does not include

1) Labour charges for the removal and replacement of defective parts and claims for direct or indirect, suffered or arisen damages.

The warranty of Teorema can not be renewed.

N.B.: It is strongly recommended that the cleaning of the chrome, gold, brass and coloured surfaces is made with soap and water, using a soft cloth.

// STANDARD PACKAGING

In order to place the order more easily by complete cartons, we listed beside most items the quantity contained in each standard carton.
