Watertec Sanitaryware. An inspiring journey...

Watertec began as a manufacturer of polymer-based product in 1997 and has since evolved into a total provider of plumbing and bathroom solutions. We are a reputable company with a solid hold in the market today, providing products that live up to the 3H Promise of high performance, hygiene, and health.

As an industry leader in polymer-based bath fittings, Watertec currently produces close to 32 million units. Our primary goal has always been to constantly improve and expand the selection of products we offer, both organic and inorganic.

The core of Watertec's purpose has always been environmental care. Since our company's founding in 1997, we have been committed to environmental responsibility and sustainable practises, from the selection of materials and product design to the use of technology and manufacturing processes.

Watertec established the Sanitaryware line with an intention of extending the product line and offering our customers the best ceramic bathroom solutions. The production process uses a consistent set of fundamental components, including clay, kaolin, feldspar, and quartz, which are all renewable, natural minerals.

Watertec products are environmentally friendly, faultless in terms of design and functionality, and economical. Each ceramic product exemplifies the finest level of craftsmanship. Washbasins, toilet seats, closets, and cisterns are thoughtfully made with quality manual labour and skill.

A blend of Quality & Affordability

Our products are precisely developed to carry out the main goal of facilitating not just elegance but performance as well. Vitreous China, Glazing Technologies, Flushing Innovations, and Thin Rim are some of the technologies and characteristics that were utilised in the design of these products.

At Watertec, we conduct a number of rigorous quality tests and checks to guarantee improved product quality. We provide goods that encourage the best possible hygiene in the bathroom using materials that have undergone scientific treatment. We create cutting-edge sanitaryware solutions with cutting-edge designs that combine outstanding quality with high aesthetics and ease. These products are a must-have for your lifestyle.

WATERTEC SANITARYWARE RANGE

Flushing Closets | Urinals | Pans | Wash Basins | Flushing Cisterns

The art of blending Quality with Affordability

Ceramic vitreous china is a polycrystalline ceramic product obtained through the high-temperature firing of a paste produced from substances like white clays and finely ground minerals like quartz, feldspar and kaolin in triaxial composition.

Glazing method enhances the physical performance of glazing on porcelain.

Nano glaze technology is a new generation anti-bacterial technology used to seal the microscopic pores of the ceramic surface. This makes it difficult for dirt and grime to settle on its surface.

Full glaze trap ensures better flushing and reduces the chances of soil returning to the bowl.

Snow white technology uses special pacifiers to enhance the gloss and white finish of the ceramics.

CERAMIC SANITARYWARE WARRANTY CERTIFICATE

- CERAMIC BODY - 10 YEARS for residential / 5 YEARS for commercial

- MECHANICAL PARTS / SEAT COVERS - 2 YEARS

- EXCLUSIONS – the warranty is not applicable for rubber and plastic parts for internal fittings.

WARRANTY TERMS:

- The warranty is applicable from the date of purchase

- The customer must produce the GST invoice in original to avail warranty service

- The company is not liable for any damage out of faulty installation

- The warranty becomes null / void if installation is done by non-qualified plumber technician or if the installation procedure is not followed as laid down by the company

- The company is not liable for any civil / construction work required during installation of new products / repair of old products

- The company is not liable for any consequential expenses or damages

- The company is not responsible for defects / damages due to transportation/ improper installation / alterations / accidents / misuse or lack of proper maintenance

- If the manufacturing defect is seen within the first year of purchase on the ceramic product, the customer is entitled for free replacement. If the manufacturing defect is seen after one year of purchase and before the warranty period expires, the customer has to pay the company on proportion basis on current MRP for new replacement

- WATERTEC will at its choice, repair, replace or make appropriate adjustment where its inspection discloses any such defects occurring in normal usage and is not responsible for installation costs

CARE AND CLEANING GUIDELINES:

- Use warm water and liquid detergent to clean the surface

- Use powder detergent on a damp cloth to remove any residual plaster / white cement / putty.

- Clean the outside surface of the vitreous china ware with mild soap and warm water

- Wipe the entire surface with a clean, soft cloth

- Do not use abrasive cleaners which may damage the ceramic surface

- Do not allow cleaners with petroleum distillates to sit on the ceramic surface for long periods of time.

- Do not use metal tools or wire brushes to remove any plaster

- Do not use cement at any hollow portion of the vitreous china ware

BENEFITS

- Eco-friendly

- Easy to clean

- Water saving

- High-performance flush

- Odourless

- Back to wall WC to facilitate cleaning and to avoid dust and dirt.

- Compact basins and toilets.

- Dual flushing mechanisms

- Rimless smooth inner wall without a rim to ensure greater hygiene and ease of cleaning.

- Our toilet seat covers are made of exclusive resins that make the products resistant to chemical agents that decolour the seat covers by turning them yellow.

- A soft closing seat cover is of the highest quality and does not break. Our Toilet seat covers are made of high-grade engineering polymer to ensure that it provides the best comfort and fit. The soft closing system allows the seat cover to fall slowly and vertically on the toilet ring, making a perfect union of elements that improve the use of the toilet on which the seat is positioned.
